

## Prior Authorization

The ClearScript Prior Authorization program promotes the effective use of prescription medications.

### What is Prior Authorization?

Medications included in the Prior Authorization program require a prior review to determine if your use of the medication is consistent with your benefit coverage. If you are prescribed a medication that requires prior authorization, your physician may wish to consider prescribing a drug that does not require prior authorization. Otherwise, your physician will need to contact ClearScript at the number on the back of your ID card to request a prior authorization review.

**Without prior authorization approval, medications in the Prior Authorization program may not be covered by your pharmacy benefit.**

**Important Note:** The drugs included on this list may not be covered by all benefit plans. Your benefit plan may require prior authorization for additional medications not included on this list. Additional coverage restrictions may apply for the medications included on this list. Your benefit plan determines coverage for all medications. This list is subject to change throughout the year.
