

Specialty Drug List

This is a list of most specialty medications on the specialty tiers of the ClearScript Formulary.

What are specialty drugs?

Specialty drugs are medications used to treat rare or complex conditions and often require special handling or monitoring.

To promote the safest, most clinically appropriate and cost-effective dispensing of these medications, your plan may require you to fill your prescriptions at a designated specialty pharmacy. Specialty pharmacies provide personalized care and offer convenient delivery to your home or other approved location.

Please refer to your benefit plan documents for information on your plan's coverage for specialty medications or contact ClearScript Member Services at the number on the back of your ID Card.

Important Note: This is not a complete list of all specialty medications. The drugs included on this list may not be covered by all benefit plans. Your benefit plan determines coverage for all medications. Additional coverage restrictions may apply for the medications included on this list. This list is subject to change throughout the year.
